POLAND TO DELIVER COAL TO SWEDEN

MAXIMUM SET AT 750,000 TONS -- Svenska Dagbladet, No 29, 31 Jan 50

According to Director Wallin of the Polish Coal Committee, who has just returned from the Swedish-Polish negotiations at Katowice, Poland will deliver a minimum of 650,000 tons and a maximum of 750,000 tons of coal to Sweden during the months of February, March, April, and May. The quantities agreed upon are somewhat smaller than those of the immediately preceding months.

NORWAY SELLS HERRING TO POLAND -- Verdens Gang, No 22, 26 Jan 50

Under an agreement made by representatives of the Norwegian Export Council and the Polish import organization, Norway will sell a total of 100,000 barrels of herring valued at 6.5 million kroner to Poland during 1950. Norway will deliver 50,000 barrels of salted large herring and spring herring, of which at least 50 percent of the large herring will come from the 1949 catch; 37,500 barrels of large herring and 12,500 barrels of spring herring would be taken from the new 1950 catch. Shipment of the old herring is to begin immediately, while the new herring is to be shipped to Poland in March and April.

POLISH BOILERS TO BULGARIA -- Naroden Far, No 1610, 6 Jan 50

Bulgarian steamships heretofore depended on England for boilers and other equipment. At present, however, boilers are being supplied from Poland and prove to be of much better and more resistant quality than the British product. Furthermore, Polish-made boiler valves turned out to be sturdier and more reliable than British-made. Bulgarian colliers and ore carriers and other coal-burning craft will henceforth be equipped with Polish-made boilers and machines.
